IDENTIV

Thursby PKard® Readers for Apple®

Ready to Go. Whenever. Wherever.

Sleek, secure Thursby PKard Readers for iOS take mobility to the next level, providing high security while supporting BYOD and GFE.

PKard Reader Overview
Identiv's Thursby PKard Readers are bundled with Sub Rosa® software to sign/encrypt/decrypt emails via Outlook Web Access (OWA) and view, create, and respond to calendar events while also accessing two-factor websites with Department of Defense (DoD)-issued Common Access Cards (CAC), federally issued Personal Identification Verification (PIV) cards, and commercially issued PIV-I cards. Every reader comes with a six-month warranty.

PKard Plug-In Reader
Tired of carrying two phones or a bulky laptop? Thursby's sturdy metal universal plug-in smart card reader makes mobile work a reality. Use of the lightning connector supports a wide range of Apple iPad® and iPhone® devices.

PKard Reader Cases
Thursby reader cases are elegant, discrete, and currently available for iPad mini, iPhone 6/6s, and iPhone 7/8/SE (2nd Gen). The cases with built-in PKard Readers are bundled with software and support for the most secure mobile CAC and PIV card enablement. Cases feature an easy on/off one-piece design, provide easy pass-through charging via the built-in micro USB port, and allow smart cards to securely slide into the back of the case.

Sub Rosa Secure Mobile Browser
Thursby's Sub Rosa suite of products provides the ability to access two-factor websites, sign, encrypt, and decrypt OWA emails, and view, create, and respond to calendar events. Software and support comes bundled at no additional charge.

High Security
- Provides secure access for BYOD (bring your own device) and GFE (government furnished equipment) deployments
- FIPS 140-2 certified

Multi-Card Support
- Department of Defense-issued CAC
- Federally issued PIV
- Commercially issued PIV-I

Bundled with Sub Rosa
- Full access to OWA calendar
- Enables smart cards to access, sign, encrypt, and decrypt emails via OWA
- Provides two-factor authentication for secure websites

Support Included
- U.S.-based phone, email, forum, or chat

Optional PDF Signing
- Edit and sign PDFs on-the-go

On November 1, 2018, Identiv announced the acquisition of **Thursby Software Systems, Inc.**, an Arlington, Texas-based provider of security software. Thursby's software solutions support BYOD (bring your own device), GFE (government furnished equipment), and two-factor authentication while providing strong security for U.S. federal government, armed forces, enterprise, and personal mobility.

Identiv (NASDAQ: INVE) is a global provider of physical security and secure identification. Identiv's products, software, systems, and services address the markets for physical and logical access control, video analytics and a wide range of RFID-enabled applications. **For more information, visit identiv.com or email sales@identiv.com.**
